

# Switching on Error Console or Debugger

## Firefox

At Menu Bar

- Tools / Web Developer / Error Console

This will open the error console. Leave it open at all times to check for JavaScript errors.

Note – You will need to click on the “Clear” button to clear these error messages regularly, as they accumulate and do not clear on their own.

## Google Chrome

This icon, located on the right hand side of the url bar, is a “Customise and control Google Chrome” button.

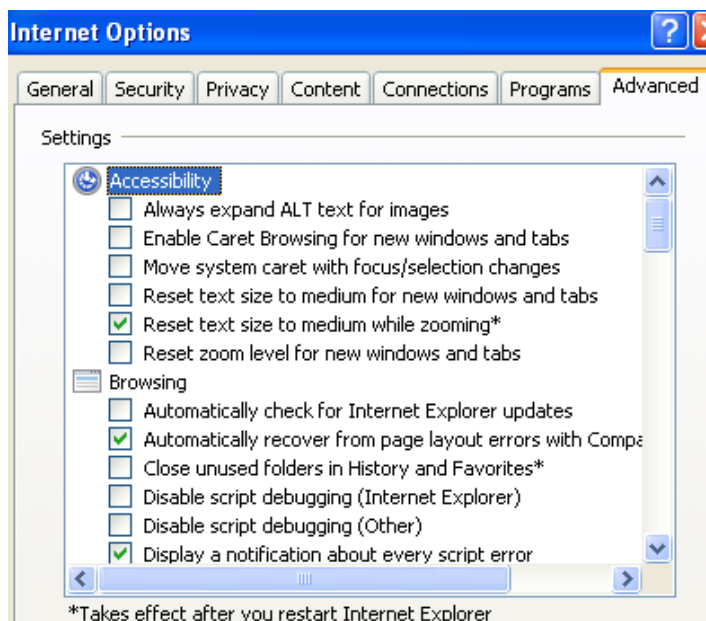

- Click on 
- Select Tools / JavaScript console

Note – the error messages will clear themselves.

## Internet Explorer

At Menu Bar

- Tools / Internet Options
- Select ‘Advanced’ tab

- Change the last 3 check boxes so they are exactly as shown above (ie., “Disable script debugging....” is unchecked, and “Display a notification....” is checked).
- Then click ‘Apply’ and ‘OK’

This will switch on the debugger.

if you see this icon on the task bar (left hand side), it means your code has an error. You will need to double click on it to view your error message.
