FTP using Dreamweaver

1. Start Dreamweaver

2. From the menu select **Site -> Manage Sites**

3. Select **New**

4. Enter a name for your site (e.g. MarysSite - use part of your name)

5. Use the **browse** icon 📁 to navigate to where you would like to save your php exercise files, (most likely on your USB stick) eg. E:\web\serverside\PHP\MyAnswers

6. Select **Servers** on left hand side of Site Setup window Enter

7. Now click on the **"+"** sign found at bottom of text area.

8. Enter for **server name:** http://infoweb.hornsby.tafensw.edu.au

9. Then for **Connect using:** FTP

10. Then **FTP Address:** 172.19.24.22

11. Enter your username (*same as phpMyAdmin username)*

12. Enter your password (*same as phpMyAdmin password*)

13. Then enter for **Root Directory**: www

14. Then enter for Web URL: http://infoweb.hornsby.tafensw.edu.au/~username

15. Now test your connection by clicking on **Test** button

16. Finally click **Save**

17. Click **Save** again

18. Expand out your PHP pane by clicking on the **PHP icon** [PHP] **and then click 'Code'** tab at top of PHP text area

19. Click on the **connect icon** to connect to server.

20. If the connection is successful you should see the connect icon change. This shows that the plug has closed, ie., connection has been made between the local site (your folder on the USB stick) to the remote site (your area on the server).

21. This icon will toggle between double pane view that displays remote (server) and local(your USB) site and single pane view that displays your local view (USB site).

Saving These Settings

When you use a different computer Dreamweaver does not have a record of the settings (connection process) you have done. So, you need to **save these settings** so you don't need to go through the previous steps.

1.	From the menu select **Site -> Manage Sites**
2.	Click on the **Export** button
3.	Make sure the first radio button, **'Back up my settings …..'** is selected.
4.	Click on the **OK** button
5.	Select the folder where you wish to save your site file (on your USB stick, eg. E:\web\serverside\PHP\My Amswers
6.	Enter an appropriate name for the file (eg. MarysSite.ste) and click on **Save**

Using Your Saved Setting On Another Computer

1.	Start Dreamweaver
2.	From the menu select **Site -> Manage Sites**.
3.	If you don't see your site in the 'Manage Sites' window, click on the **Import** button
4.	Select the correct folder and then your site file (eg. MarysSite)
5.	Click on **Done**
